Sean Pacheco

Software Engineer

SUMMARY

Focused, versatile, computer science student that works great on a team. Have worked on various successful front and back-end web applications. Looking to join a tight knit team where I can make use of my skills.

WORK EXPERIENCE

Freelance

Current

- Developed multiple internal tools for pool maintenance businesses
- Built full stack webapps using React, Node.js, and a relational database(PostgeSQL)

Software Engineer Apprenticeship at 100Devs, Los Angeles, CA

2022 — 2023

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full-stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Pool-Manager – **(Fullstack Web App)** where pool and spa professionals can keep a list of accounts that they service and log chemical testing history and view that history using various data visualizations.Built with React and typescript on the frontend with Auth0 authentication. Backend REST API is built using Express.js and node with JWT authentication and pg-promise connecting to a PostgreSQL database. Has client and Server-side form validation and server-side pagination and search.
